PROFESSIONAL SUMMARY

Results-driven Fullstack Developer and AI Engineer specializing in building robust, end-to-end web applications and intelligent systems. Proficient in modern web frameworks (Next.js, FastAPI) and machine learning integration (TensorFlow, OpenAI). Demonstrated ability in delivering comprehensive digital solutions, from adaptive learning platforms to complete SaaS operational dashboards, blending architectural system thinking with seamless user experiences.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, HTML5, CSS3
- **Web Technologies & Frameworks:** React.js, Next.js, FastAPI, Node.js, Express, Tailwind CSS, RESTful APIs
- **AI & Machine Learning:** TensorFlow, PyTorch, TensorRT, NLP, Computer Vision, On-Device ML, Generative AI (OpenAI API), Vector Databases
- **Tools & Databases:** PostgreSQL, MySQL, Git, GitHub, VS Code, Figma, Prompt Engineering

EXPERIENCE

Freelance Web Developer | *Zeera Laundry* | Yogyakarta, Indonesia Jul 2026 – Present

- Engineered and deployed a comprehensive fullstack web information system to optimize daily laundry operations and business management.
- Developed a centralized Point of Sale (POS) operational dashboard for admins with automated financial analytics and master data management.
- Designed a login-free, responsive customer tracking portal utilizing QR code integration, enabling real-time order status monitoring.

AI Engineering Cohort | *Dicoding Indonesia* | Remote Feb 2026 – Aug 2026

- Completed an intensive, project-based scholarship program focusing on advanced Python ecosystems and Machine Learning fundamentals.
- Developed and deployed practical AI models, optimizing them for integration into modern web applications.
- Earned multiple technical certifications and a graduation credential reflecting comprehensive mastery in software development and professional soft skills.

PROJECTS

KreasiKan: AI Content Platform | *Next.js, OpenAI, SaaS*

- Developed an all-in-one content automation platform helping creators and small businesses scale their social media presence.
- Implemented a visual workflow builder connecting multiple AI models to generate customized, platform-ready content seamlessly.

AMATI: Adaptive Learning Recommender System | *Python, FastAPI, TensorFlow*

- Built a smart educational platform that leverages AI algorithms to act as a virtual tutor for mathematics.
- Engineered a robust backend system that processes user performance data to adapt curriculum difficulty to each student's pace in real-time.

EduKids Learning App | *Kotlin, On-Device ML*

- Created an interactive Android mobile application designed to provide safe, gamified educational modules for children.
- Integrated on-device machine learning capabilities to recognize physical objects through the camera, bridging physical and digital learning environments.

ACHIEVEMENTS

2nd Place Winner, Digital Business & Fintech | *GEMASI AMIKOM* *2026*

- Demonstrated innovative business strategy and product feasibility in a highly competitive digital business evaluation.

3rd Place Winner, Programming Category | *GEMASI AMIKOM* *2025*

- Showcased strong logical algorithmic problem-solving and clean code implementation under strict time constraints.

EDUCATION

Universitas AMIKOM Yogyakarta | **Yogyakarta, Indonesia** *2023 – Present*

Bachelor of Information Technology | GPA: 4.00 / 4.00
